

Emissions Trading Regulation (AR 33/2006)
Environmental Protection and Enhancement Act

Frequently Asked Questions

Provisional Credit Retirement (June 4, 2015)

Q. Can an operator use credits created in one year for compliance in the same year?

A. If an operator submits a credit application to the Director prior to April 30th and the credits are needed for compliance on April 30th, the operator can apply to have the credits retired while the credit application is pending. If the credit application is unsuccessful, then the operator has not met the conditions of their *Environmental Protection and Enhancement Act* approval.
