## High Streamflow Advisory Update

A flood watch has been downgraded to a [High Streamflow Advisory](#) for the following streams and their tributaries in the North Saskatchewan River, Red Deer River and Bow River basins:

- North Saskatchewan River downstream of the City of Edmonton including the Alberta/Saskatchewan border
- Nordegg, Ram, Clearwater Rivers and tributaries of the North Saskatchewan River upstream of Lodgepole.
- Red Deer River upstream of Dickson Dam
- Red Deer River downstream of Dickson Dam
- Little Red Deer River
- Bow River (including the City of Calgary)

These streams have peaked and continue falling slowly.

A [High Streamflow Advisory](#) has ended for the following stream and its tributaries in the Bow River basin:

- Elbow River upstream and downstream of the Glenmore Dam (including the City of Calgary)

This stream has peaked and continues falling slowly.

Additional information is available from the Forecasters Comments on our website at:

<http://www3.gov.ab.ca/env/water/ws/ForecastersComments/index.html>.

This advisory will be updated as the situation changes.

---

**A High Streamflow Advisory means that stream levels are rising or expected to rise rapidly and no major flooding is expected.** Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected (campers, fishermen, boaters and the general public) is advised to be cautious of the rising levels.

---

**A Flood Watch means that stream levels are rising and will approach or may exceed bank full.** Flooding of areas adjacent to these streams may occur. Anyone situated close to the streams is advised to take appropriate precautionary measures.

---

**A Flood Warning means that rising river levels will result in flooding of areas adjacent to the streams affected.** Anyone situated close to the river should take appropriate measures to avoid flood damage
