

High Streamflow Advisory for South Central Alberta

Alberta Environment has issued a High Streamflow Advisory for the following streams and their tributaries:

In the North Saskatchewan River Basin:

- **North Saskatchewan River downstream of the Bighorn Dam** (including the Town of Drayton Valley and the City of Edmonton)

In the Oldman River Basin:

- **Little Bow River**

A major low pressure system has brought 70 to 130 mm of rain to South Central and Southern Alberta in the past two days. Environment Canada has ended its Heavy Rainfall Warnings for southern Alberta and are forecasting additional rainfall amounts of 10 to 15 mm for Coronation, Brooks and Hanna regions today. Rivers and streams are rising in response to the precipitation but no major flooding is anticipated at this time.

High Streamflow Advisory Update for South Central Alberta

High Streamflow Advisories remain in effect for the following streams and their tributaries:

In the North Saskatchewan River Basin:

- **Clearwater River** (including Dovercourt)

- **Drywood Creek**

This advisory will be updated if the situation changes.

Alberta Environment is monitoring river levels closely and is in close contact with Alberta Forestry and Environment Canada Weather Services. Additional information is available from the Forecasters Comments on our website at: <http://www3.gov.ab.ca/env/water/ws/ForecastersComments/index.html>.

A High Streamflow Advisory means that stream levels are rising or expected to rise rapidly and no major flooding is expected. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected (campers, fishermen, boaters and the general public) is advised to be cautious of the rising levels.

A Flood Watch means that stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the streams is advised to take appropriate precautionary measures.

A Flood Warning means that rising river levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage
