
Flood Watch for Southwest Alberta

A [Flood Watch](#) has been issued for the following stream in the Oldman River basin:

- **Belly River**

This river is rising rapidly in response to the 250 mm of precipitation which fell over the past 48 hours. No significant additional precipitation is forecast for the region.

High Streamflow Advisory Update

A [High Streamflow Advisory](#) has been issued for:

- **Waterton Lakes in Waterton Park**
- **Oldman River downstream of the Oldman Dam**

The Lake and Oldman River are rising in response to the large amounts of precipitation which have fallen over the last 48 hours. The greatest rise on the Oldman River is expected to occur downstream of the Belly River confluence.

High Streamflow Advisory

A [High Streamflow Advisory](#) remains in effect for the following rivers and streams in the Oldman River basin:

- **Waterton River above the Waterton Dam**
- **Castle River**
- **Drywood Creek**
- **Crowsnest River**

The Castle, Drywood and Crowsnest Rivers have peaked. The Waterton River continues to rise.

A High Streamflow Advisory means that stream levels are rising or expected to rise rapidly and no major flooding is expected.

Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected (campers, fishermen, boaters and the general public) is advised to be cautious of the rising levels.

A Flood Watch means that stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the streams is advised to take appropriate precautionary measures.

A Flood Warning means that rising river levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage
