
High Streamflow Advisory for South Central Alberta

A **High Streamflow Advisory** has been issued for the following rivers and their tributaries in the Red Deer Basin:

- **Little Red Deer River**
- **Raven River (near Raven)**
- **Bearberry Creek (near Sundre)**
- **Fallentimber Creek (near Sundre)**

These streams are rising in response to 20 to 30 mm of rain which has fallen since yesterday. Rain is continuing to fall in this region, with a further 10 to 15 mm of precipitation being forecast today.

A **High Streamflow Advisory** remains in effect for the following river in the Athabasca River Basin:

- **South Heart River**

Water levels on the South Heart River system are slowly receding but remain high.

Alberta Environment is monitoring river levels closely and is in close contact with Alberta Forestry's and Environment Canada's Weather Services. Additional information is available from the Forecasters Comments on our website at: <http://www3.gov.ab.ca/env/water/ws/ForecastersComments/index.html>.

This advisory will be updated if the situation changes.

A High Streamflow Advisory means that stream levels are rising or expected to rise rapidly and **no major flooding is expected**. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected (campers, fishermen, boaters and the general public) is advised to be cautious of the rising levels.

A Flood Watch means that stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the streams is advised to take appropriate precautionary measures.

A Flood Warning means that rising river levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage
