

High Streamflow Advisory Ended for Northern Alberta

The **High Streamflow Advisory** has ended for the following streams and their tributaries in the Athabasca River basin:

- **Swan River**
- **Driftpile River**
- **East Prairie River** (near Enilda)
- **West Prairie River** (near High Prairie)
- **South Heart River upstream of South Heart Reservoir** (near Peavine)

The **High Streamflow Advisory** has ended for the following river and its tributaries in the Peace River basin:

- **Heart River**

Water levels of the West Prairie, South Heart and Heart Rivers are currently rising in response to rainfall that occurred earlier this week, but are not expected to rise significantly. Water levels in the other streams listed have peaked and are receding.

High Streamflow Advisory Ended for North and Central Alberta

The **High Streamflow Advisory** has ended for the following streams and their tributaries in the Bow River basin:

- **Bow River** upstream of and including Banff
- **Bow River** downstream of Banff (including Canmore, Calgary and Hidden Valley)
- **Nose Creek** (including Airdrie and Calgary)

The **High Streamflow Advisory** has ended for the following rivers and their tributaries in the Red Deer River basin:

- **Medicine River** near Eckville
- **Raven River**

The **High Streamflow Advisory** has ended for the following rivers and their tributaries in the North Saskatchewan River basin:

- **North Saskatchewan River** upstream of Lake Abraham
- **North Saskatchewan River** downstream of Bighorn Dam (including the City of Edmonton)

The **High Streamflow Advisory** has ended for the following rivers and their tributaries in the Athabasca River basin:

- **Miette River** near Jasper
- **Athabasca River upstream of Hinton** (including Hinton and Jasper)
- **Athabasca River** downstream of Hinton (including the Town of Athabasca and Fort McMurray)

The **High Streamflow Advisory** has ended for the following river and its tributaries in the Smoky River basin:

- **Smoky River** near Grande Cache

High Streamflow Advisory Ended

Issued at: 2:30 PM, June 14, 2007

Issued by: River Forecast Centre, Flow Forecasting

Water levels in these streams have peaked and are falling back toward normal levels. Precipitation forecast for today and tonight in many of these areas is not expected to raise stream levels significantly.

Alberta Environment is monitoring river levels closely and is in close contact with Alberta Forestry's and Environment Canada's Weather Services. Additional information is available from the Forecasters Comments on our website at: <http://www3.gov.ab.ca/env/water/ws/ForecastersComments/index.html>

This advisory will be updated if the situation changes.

A High Streamflow Advisory means that stream levels are rising or expected to rise rapidly and no major flooding is expected. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected (campers, fishermen, boaters and the general public) is advised to be cautious of the rising levels.

A Flood Watch means that stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the streams is advised to take appropriate precautionary measures.

A Flood Warning means that rising river levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage
