

High Streamflow Advisory Update for Southern Alberta

A **High Streamflow Advisory** remains in effect for the following streams and their tributaries in the Red Deer, Bow, Oldman and South Saskatchewan River basins:

- **Little Red Deer River**
- **Bow River (downstream of Calgary, including Hidden Valley)**
- **Little Bow River**
- **Waterton River**
- **South Saskatchewan River (including the City of Medicine Hat)**

All the streams have peaked and are steady or falling slowly. Water levels of these streams remain high.

High Streamflow Advisory Update for Central Alberta

A High Streamflow Advisory remains in effect for the following stream and its tributaries in the North Saskatchewan River basins:

- **North Saskatchewan River (upstream of and including the City of Edmonton)**

This stream has peaked and is falling slowly. The water level of this stream remains high.

High Streamflow Advisory Ended for Central Alberta

A High Streamflow Advisory has ended for the following stream and its tributaries in the Red Deer River basin:

- **Red Deer River (upstream of Dickson Dam including the Town of Sundre)**

This stream has peaked and is falling slowly.

High Streamflow Advisory Ended for North Central Alberta

A High Streamflow Advisory has ended for the following stream and its tributaries in Athabasca River basin:

- **Pembina River**

This stream has peaked and is falling slowly.

Alberta Environment is monitoring river levels closely and is in close contact with Alberta Forestry Weather and Environment Canada Weather Services. Additional information is available from the Forecasters Comments on our website at: <http://environment.alberta.ca/forecasting/ForecastersComments/index.html>.

This advisory will be updated if there is any change in conditions.

A High Streamflow Advisory means that stream levels are rising or expected to rise rapidly and **no major flooding is expected**. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected (campers, fishermen, boaters and the general public) is advised to be cautious of the rising levels.

A Flood Watch means that stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the streams is advised to take appropriate precautionary measures.
