<http://www.environment.alberta.ca/apps/basins>

**High Streamflow Advisory** – Stream levels are rising or expected to rise rapidly and no major flooding is expected. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected is advised to be cautious of the rising levels.

**Flood Watch** – Stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the river is advised to take appropriate precautionary measures.

**Flood Warning** – Rising stream levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage.

## Streamflow Advisory Overview for Alberta

Advisories apply to streams and their tributaries unless otherwise noted.

- Since Friday, between 20 to 60 mm of precipitation fell in central and northern Alberta with local higher amounts of 70 mm
- By the end of today, an additional 15 to 30 mm of precipitation is forecast in northeast Alberta and showers are forecast of central Alberta
- Conditions are being monitored – an update will be issued as required

### Athabasca River Basin

Stream	High Streamflow Advisory	Flood Watch	Flood Warning	Water Level Status	Advisory Status
All streams flowing out of the Swan Hills	✓			rising	New
